

Does AI Cheapen Talk? — Architecture Diagram

Core nodes shown with coloured borders · Leaf nodes depend on core but nothing depends on them · Arrows show data/call flow

Core module Data layer Leaf component (UI) External / config

EXTERNAL & CONFIG

OpenAI API

gpt-4o-mini · REST over HTTPS

.env.local

VITE_OPENAI_API_KEY
Injected at build time by Vite

vite.config.js

Build tool · Tailwind CSS v4
OXC transform · React plugin

API BRIDGE

openaiSender.js ← CORE

Owns all OpenAI calls · exports 4 async functions

- **generateSenderPitch()** — AI writes a pitch (expert or bluff)
- **generateReceiverDecision()** — AI evaluates a pitch as receiver
- **improvePitch()** — rewrites user pitch more convincingly
- **improveGrammar()** — grammar-only fix, no content change

DATA LAYER

questions.js ← CORE DATA

Static question bank · no external dependencies

- **FIELDS[]** — 8 business functions (strategy, HR, finance...)
- **QUESTIONS[]** — 160 MCQ questions (20 per field, A–D options)
- **getRandomQuestions(field, n)** — filters & shuffles pool

CORE APP

App.jsx — State Machine ← CORE ORCHESTRATOR

All game state lives here · imports openaiSender + questions · renders screen components

- **phase:** role_select | sender_answering | sender_pitching
- **phase:** ai_evaluating | round_start | thinking | evaluate
- **phase:** reveal | gameover
- **scores** { sender, receiver }
- **round, history[], currentField**
- **questions[], userAnswers[], userPitch**
- **senderType:** expert | non-expert
- **payoffs:** { +4/+2/0 based on outcome }

SHARED UI

Header

Round counter · scores
You vs AI label

FieldBadge

Coloured pill per field
Used in every screen

LoadingScreen

Spinner during all
async API calls

SCREEN
COMPONENTS (LEAF
NODES)

RoleSelectScreen

Hire vs Apply
Field picker (shown after role)

RoundStart

Receiver only
Triggers AI pitch gen

SenderAnsweringScreen

Radio-button MCQ
Local grading (no API)

EvaluateScreen

Shows AI pitch + questions
Hire / Not Hire buttons

SenderPitchingScreen

Pitch textarea
Improve AI · Fix Grammar

RevealScreen
